Current Location: Manyata Tech Park, Bangalore, KA. **Home Town:** Gwalior, MP

Enterprise Architecture professional with over a decade of IT experience, specializing in aligning business strategy with scalable technology solutions. Experienced in designing and implementing AI-driven systems and neural network–based models to enhance intelligent decision-making. Committed to transforming business goals into enterprise capabilities and enabling seamless, boundary-less information flow to drive innovation and sustainable growth.

SUMMARY:

- 12+ years of experience in architecting and developing scalable web applications using JavaScript and TypeScript ecosystems.
- 5+ years of experience in designing, developing, and deploying AI solutions, including custom neural network–based model creation and optimization.
- Hands-on experience in integrating AI solutions, including Large Language Models (LLMs) and custom neural network models, into enterprise web applications to enable predictive analytics, intelligent automation, and data-driven decision-making.
- Strong expertise in ReactJS, NextJS, and Redux for building high-performance, enterprise-grade user interfaces.
- Experienced in designing and developing RESTful APIs and microservices using NodeJS, including AI service integration layers.
- Led implementation of Enterprise Single Sign-On (SSO) and robust authentication/authorization frameworks aligned with enterprise security standards.
- Extensive experience in unit testing, integration testing, and automated quality assurance strategies.
- Designed and managed CI/CD pipelines using Jenkins to automate build, test, and deployment processes.
- Proficient in database architecture and optimization using MongoDB and MySQL, working with various ORM frameworks.
- Advocate of clean architecture, scalable design principles, accessibility standards, and performance optimization to solve complex business challenges.

ACADEMICS / EDUCATION:

- **Doctor of Philosophy (Ph.D.)** in Computer Science, Jiwaji University, Gwalior – 2023
  Dissertation: "Financial Investment Forecasting and Trading Strategy Using Hybrid Soft Computing"
- **Master of Philosophy (M.Phil.)** in Computer Science, School of Studies in Computer Science & Applications (SOSCSA), Jiwaji University, Gwalior – 2013
- **Master of Science (M.Sc.)** in Computer Science, SMS Science College, Gwalior – 2010
- **Bachelor of Science (B.Sc.)** in Computer Science, SMS Science College, Gwalior – 2008

IT SKILLS:

- **Advanced Technologies:** MongoDB, ExpressJS, ReactJS, NodeJS, MERN Full Stack, JavaScript, TypeScript, NextJS, Redux, Unit Testing, Python, Artificial Intelligence (AI), Machine Learning (ML),

Neural Networks, Large Language Models (LLMs), Django, PHP, HTML5, CSS3, Azure, AWS, Docker, CI/CD, Jenkins, Git, Jira and related tools.
- **Programming Skills:** C, C++, C#, Java, Python, JavaScript, TypeScript.
- **Databases:** MongoDB, MySQL, Microsoft SQL Server.

WORK EXPERIENCE:

- **Senior Solution Architect – Development,** HCL Tech Limited. *May 2025 – Present*
- **Senior Tech Lead – Development,** Birlasoft Limited. *Jan 2024 – April 2025*
- **Specialist – Package Implementation Developer**, LTIMindtree Ltd. *Oct 2021 – Nov 2023*
- **Senior Web & ML/Neural Network Developer**, Praedico Global Research Pvt. Ltd. *July 2018 – Sept 2021*
- **Web Developer**, Numeric Info Systems Pvt. Ltd. *July 2013 – June 2018*

WEB DEVELOPMENT / APPLICATION:

Project 9 – OneMES (Bayer, Germany)
Senior Solution Architect | May 2025 – Present | Bangalore

- Leading end-to-end architecture and development of an enterprise-grade Manufacturing Execution System (MES) using MERN Stack and NextJS.
- Designing scalable microservices architecture and high-performance API layers with advanced state management.
- Integrating AI-driven modules for production monitoring, anomaly detection, and predictive analytics.
- Implementing real-time data pipelines to enable intelligent, data-driven manufacturing decisions.
- Architecting secure REST APIs with enterprise-grade authentication and role-based access control.
- Designing CI/CD pipelines and containerized cloud deployments using Azure DevOps.
- Driving system scalability, performance optimization, and cross-functional team leadership.

Project 8 – Cardinal (Johnson & Johnson, USA)
Senior Tech Lead – Development | Jan 2024 – April 2025 | Bangalore

- Leading end-to-end development of *Cardinal*, an enterprise-grade web application built using MERN Stack and NextJS.
- Architecting scalable front-end and back-end solutions with Redux state management.
- Designing CI/CD pipelines and containerized deployments using Azure.
- Driving system architecture decisions, performance optimization, and secure API design.
- Leading a cross-functional development team and acting as the primary technical liaison with clients.

Project 7 – RISE Automation (Johnson & Johnson, USA)
Specialist – Package Implementation | Oct 2021 – Nov 2023 | Bangalore

- Developed and implemented RISE Automation platform for Johnson & Johnson (USA) using MERN Stack, NextJS, AWS, and Docker.
- Led module-level architecture and acted as a key contributor in full-stack development.
- Designed scalable workflows and automation modules to improve enterprise process efficiency.
- Coordinated directly with client stakeholders for requirement analysis and delivery alignment.

Project 6 – Praedico Education & Stock Prediction Portal
Senior Developer | Jan 2020 – Sept 2021 | New Delhi

- Designed and developed subscription-based web portal integrating stock price prediction models.
- Implemented technical indicator–based forecasting (Strong Buy, Buy, Neutral, Sell, Strong Sell) using MERN Full Stack with predictive modelling.

- Deployed on AWS with scalable architecture.
- Contributed to AI-driven financial analytics features.

Project 5 – Praedico Neural Portfolio Assist
Developer | Apr 2017 – Dec 2019 | New Delhi

- Built AI-driven portfolio generation system using neural network–based algorithms.
- Developed intelligent asset allocation features using predictive modelling concepts with Web Application using MERN Technology.

Project 4 – Praedico Virtual Office
Developer | Apr 2017 – Dec 2017 | New Delhi

- Developed enterprise virtual office platform for employee monitoring and management.
- Designed role-based access and performance tracking features using PHP and MySQL.

Project 3 – Praedico Global Research Website
Junior Developer | Jan 2016 – Mar 2017 | New Delhi

- Developed and maintained company's primary website using PHP and MySQL.

Project 2 – Numeric Info Systems Website
Junior Developer | Aug 2015 – May 2016 | New Delhi

- Designed and developed corporate website using PHP and MySQL.

Project 1 – Student Portal for Binary Systems
Junior Developer | Jul 2013 – Aug 2015 | New Delhi

- Developed student monitoring and management portal using PHP and MySQL.

PUBLICATIONS:

- **Published and presented multiple peer-reviewed research papers in reputed national and international journals and conferences, focusing on Artificial Intelligence, Hybrid Soft Computing, Financial Forecasting, and Intelligent Trading Systems.**

PATENT REGISTERED:

- **Title:** AI-BASED ENSEMBLED BOT MECHANISM FOR INDIAN STOCK MARKET PREDICTION AND CUSTOMER ADVISORY SYSTEM FOR TRADERS
- **Application Number:** 201921032486
- **Status:** Published

ACADEMIC PROJECTS & TRAININGS:

- Developed a website on ***PS-Softtech*** using ASP.net with SQL Server.
- Developed a software on ***Office Management*** using C# with Windows Application in .NET for ROSHNI (semi govt. project)
- Developed a software on ***Library Management*** using C# with Windows Application in .NET for Science College (Govt. project).
